Data Analyst

Junior Data Analyst with solid skills in Python and SQL, focused on transforming data into clear and actionable insights. I would like to work in a collaborative environment where I can grow, expand, and apply my knowledge.

Technical Skills

Python (pandas, NumPy, Matplotlib, Seaborn, Scipy, Scikit-learn) | SQL (PostgreSQL, advanced queries, joins, aggregations) | Exploratory Data Analysis (EDA) | Data Visualization | Statistical Tests (A/B testing, hypothesis) | Machine Learning (predictive models, clustering) | Tableau | English: Advanced | Spanish: Native | Agile Methodologies

Project Portfolio

Project Portfolio Telecommunications Project | TripleTen Data Analyst (2025-2026)

- Used pandas and NumPy libraries to clean, transform, and analyze telecommunication data, working with groupings and filtering of information.
- Generated graphs to visualize customer usage and behavior trends using Seaborn and Matplotlib.
- Applied statistical tests with Scipy to validate hypotheses and analyze differences between variables
- Developed predictive models to identify patterns in the data.
- Achievement or Impact: Identification of behavior patterns that enable improved decision-making in telecommunication services.

Technological skills used: Python (pandas, NumPy, Matplotlib, Seaborn, Scipy)

Predictive Modeling and Clustering | TripleTen Data Analyst (2025-2026)

- Used pandas and NumPy to prepare and transform data for modeling.
- Implemented machine learning models using Scikit-learn for key variable prediction.
- Applied clustering techniques to segment data and find groups with similar characteristics.
- Generated visualizations with Seaborn and Matplotlib to interpret model results
- Applied statistical tests to validate results.
- Achievement or Impact: Effective data segmentation that enables profile identification and improves data-driven strategies.

Technological skills used: Python (pandas, NumPy, Matplotlib, Seaborn, Scipy, Scikit-learn)¹

Ride Service – Data Analysis | TripleTen Data Analyst (2025-2026)

- Used SQL and pandas to extract and analyze ride data and user behavior.
- Generated visualizations with Matplotlib and Seaborn to analyze service usage patterns
- Applied statistical tests with Scipy to validate differences between data groups.
- Achievement or Impact: Identification of demand patterns that help optimize service operation.

Technological skills used: Python (pandas, Matplotlib, Seaborn, Scipy), SQL

A/A/B Test – Food Products | TripleTen Data Analyst (2025-2026)

- Used pandas and NumPy to clean and prepare experimental data.
- Applied A/A/B statistical tests using Scipy to validate experiments.
- Generated visualizations with Matplotlib and Seaborn to interpret results.
- Analyzed significant differences between groups for decision-making.
- Achievement or Impact: Validation of experiments that enable the optimization of data-driven decisions.

Technological skills used: Python (pandas, NumPy, Matplotlib, Seaborn, Scipy)

Professional Experience

Agency VA | Customer Service Representative (Remote) June/2022 - November/2025

Virtual assistant agency for insurance agencies in the USA

- Managed phone payments for insurance policies, improving the retention rate to 92%
- Created Excel reports on daily tasks ensuring consistent positive results.
- Collaborated in a multicultural team, providing my use of Spanish to assist non-bilingual clients.

Ibex | Customer Service Representative Managua April/2020 - May/2022

Outsourcing Company

- Managed customer assistance requests, averaging a satisfaction percentage of over 95%.
- Collaborated with the training team to assist new hires, helping them become familiar with daily tasks, generating a positive experience.

Education

Data Analyst Certificate , TripleTen	2025 - 2026
Systems Engineering , Universidad Central de Nicaragua (UCN)	2024 - 2028
HTML & CSS Certificate , CodeCademy	2024

Languages

English (TOEIC Certificate - Advanced)

Spanish (Native)
